PROFESSIONAL SUMMARY

Results-driven AI/ML Engineer with hands-on experience in building end-to-end machine learning pipelines, data analysis, and deploying intelligent solutions. Proficient in Python, exploratory data analysis, machine learning algorithms, neural networks, and natural language processing. Adept at working collaboratively in team environments and communicating technical insights to stakeholders.

TECHNICAL SKILLS

Languages	Python, MySQL
Machine Learning	Regression, Classification, Clustering, Model Evaluation, Feature Engineering
Deep Learning	Neural Networks (ANN, CNN), Keras, TensorFlow
NLP	Text Preprocessing, Tokenization, TF-IDF, Word Embeddings, Word2Vec.
Data Analysis	Exploratory Data Analysis (EDA), Pandas, NumPy, Matplotlib, Seaborn
Database	MySQL — schema design, queries, joins, data manipulation
Soft Skills	Communication, Teamwork, Problem-Solving, Adaptability
Tools & Others	Jupyter Notebook, Google Colab, Git, GitHub, Scikit-learn

WORK EXPERIENCE

Data Science Intern | [Apana Time Tech Solution](#) 02/2026 – 05/2026

- Gained practical experience with Python for data preprocessing, feature engineering, and model building.
- Performed in-depth Exploratory Data Analysis (EDA) to uncover patterns and actionable insights from raw datasets.
- Designed and queried relational databases using MySQL for data extraction and management.
- Collaborated with cross-functional teams to translate business requirements into data-driven solutions.
- Documented findings and presented insights clearly to both technical and non-technical audiences.

PROJECTS

SMS & Email Spam Detection — [Python](#) · [NLP](#) · [Scikit-learn](#) · [TF-IDF](#) · [Naive Bayes](#)

- Built a text classification system to detect spam messages across SMS and email channels.
- Applied NLP techniques including tokenization, stopword removal, and TF-IDF vectorization for feature extraction.
- Trained and evaluated multiple classifiers (Naive Bayes, Logistic Regression) achieving high accuracy and precision.
- Deployed an interactive web interface using Streamlit to demo the model in real time.

Housing Price Prediction — [Python](#) · [EDA](#) · [Regression](#) · [Scikit-learn](#) · [Matplotlib](#)

- Analyzed housing datasets through comprehensive EDA — identifying outliers, correlations, and missing values.

- Engineered features and applied Linear Regression and Random Forest to predict property prices accurately.
- Optimized model performance through hyperparameter tuning and cross-validation techniques.
- Visualized prediction results and feature importance to communicate model behavior clearly.

Banking Risk Analysis — [Python](#) · [Pandas](#) · [Machine Learning](#) · [MySQL](#)

- Developed a risk assessment model to classify banking customers based on credit and loan default likelihood.
- Preprocessed and merged structured financial data from MySQL databases for model input.
- Applied classification algorithms (Decision Tree, Random Forest) and evaluated with AUC-ROC metrics.
- Provided actionable risk segmentation insights to support data-driven lending decisions.

Employment Management System — [Python](#) · [MySQL](#) · [CRUD Operations](#)

- Designed and implemented a command-line application for managing employee records and HR workflows.
- Built a relational MySQL database schema covering employees, departments, salaries, and attendance.
- Developed full CRUD (Create, Read, Update, Delete) operations with a clean Python interface.
- Ensured data integrity through constraints, foreign keys, and parameterized SQL queries.

EDUCATION

Bachelor Of Technology | [Deenbandhu Chotu Ram University of Science and Technology](#) 2022-26
Computer Science Engineering 7.72 CGPA

Senior Secondary | [J P Jain Senior Secondary School](#) 2021-22
Non-Medical 82.6%

High School | [J P Jain Senior Secondary School](#) 2019-20

CERTIFICATIONS

- **Soft Skills Training Certificate** | [Geet Infosys](#)
 - **Internship Training Certificate** | [Apana Time Tech Solution](#)
-
