EXPERIENCE

Web Developer | Codsoft

Internship | Nov 2025 – Jan 2026 (1 Month)

- Enhanced user engagement by designing responsive interfaces with HTML, CSS & JavaScript.
- Created visually appealing, user-friendly web solutions applying UI/UX design principles.
- Developed front-end components for real-world projects with focus on performance & accessibility.
- Implemented cross-browser compatible layouts ensuring consistent experience across devices.

PROJECTS

1. FinanceIQ Dashboard

Duration: 2025

Tools Used: HTML, CSS, JavaScript, Charts

Role: Front-End Developer

Live: vivekshri1212.github.io/finance-dashboard

Objective:

To build a full-featured personal finance tracker with real-time analytics and role-based access.

Key Responsibilities:

- Built income/expense tracking with live balance calculations and monthly trend charts.
- Implemented role-based views (Admin/Viewer) and category-wise spending breakdown.
- Designed transaction management with filters, sorting and real-time data visualisation.

2. Task Manager App

Duration: 2025

Tools Used: HTML, CSS, JavaScript, Netlify

Role: Front-End Developer

Live: vivek-task.netlify.app

Objective:

To create a functional task management tool with persistent state and responsive design.

Key Responsibilities:

- Built add, edit, delete & status-toggle features with persistent state management.
- Deployed live on Netlify with continuous delivery from GitHub repository.

3. Personal Portfolio Website

Duration: 2025

Tools Used: HTML, CSS, JavaScript, Figma

Role: Front-End Developer

Live: vivekshri1212.github.io/portfolio_vivek

Objective:

Hackathon – Think Tankers

September 2025

Skills: Problem Solving

To design and develop a responsive portfolio showcasing projects with modern UI patterns.

Key Responsibilities:

- Applied UI design principles and Figma for wireframing to improve visual appeal and usability.
 - Optimised with semantic HTML and clean modular CSS architecture.
-
